Derwent Title: Leakage current measuring device - has relay to indicate leakage exceeding permitted level and uses visual and audio circuit to indicate presence of leakage

Original Title: ☒ SU1798740A1: DEVICE FOR MEASUREMENT OF LEAKAGE CURRENTS

Assignee: PRIBOR WKS Soviet institute

Inventor: LISUNOV P P; POLISHCHUK YA L;

Accession/Update: 1994-143523 / 199417

IPC Code: G01R 31/02 ;

Derwent Classes: S01;

Manual Codes: S01-G04A5(Testing for leakage)

Derwent Abstract: (SU1798740A) A leakage current measuring device consists of a symmetrical resistive voltage divider, a relay, electro-measuring instruments (7,8), a connecting button and resistor-equivalents and the measuring circuits, contg. the instruments (7,8), and commutated to the body of a trolley bus through the door opening and closing system.

This eliminates the possibility of voltage passing to people during leakage between the body and earth.

USE/Advantage - Measurement of leakage current in electrical equipment of trolley-buses supplied by grounded two wire DC circuit. Measurement of leakage in any wire.

Bul. 8/28.2.93
